

ananta ghosh ftp server configure in linux

```
yum -y install vsftpd
```

```
yum -y install ftp
```

```
cd /var/ftp/pub/
```

```
touch titas.txt
```

```
mkdir software
```

```
systemctl enable vsftpd
```

```
systemctl restart vsftpd.service
```

```
firewall -cmd >enter>services>ftp
```

Or

```
[root@rhel7 ~]# firewall-cmd --zone=public --add-port=21/tcp --permanent
```

```
[root@rhel7 ~]# firewall-cmd --reload
```

or

```
firewall-cmd --permanent --add-service=ftp
```

```
firewall-cmd --reload
```

how to check installed package?

```
rpm -qa | grep ftp
```

how to check firewall adding status?

```
firewall-cmd --list-all
```

how to remove any package (like- ftp)

```
rpm -qa vsftpd
```
