

Mail server

SMTP (simple mail transfer protocol)

Need package postfix

we need to configuration

vim /etc/postfix/main.cf

myhostname =mail.titassarker.com

mydomain= titassarker.com

myorigin=\$mydomain

inet_interfaces=all

mydestination= As per required

mynetworks= 192.168.1.0/24

relayhost –[smtp.titassarker.com]

systemctl restart postfix.service

firewall-cmd –permaent –add-service=smtp

firewall-cmd --reload

Create an user for email sending

Check mail server

mail
