How to reset/break password?

Step-01:

Boot using Windows Disk.

Step-02: Go to repair mode.

Step-03-Open the Command Prompt.

At the command prompt, type the following commands:

MOVE C:\Windows\System32\Utilman.exe C:\Windows\System32\Utilman.exe.bak

Step-04-Now close the command prompt dialog, reboot the Windows Server 2008 r2 system and allowing Windows to load as normal. When you are at the Logon screen, you need click on the "Ease of access" icon.

Step-05- At the command prompt, enter the following command: "net user administrator *".
